Lieutenant

MEMORANDUM

TO: Town Board and Planning Board
CC: Town Staff and Consultants
FROM: Lt. James Carroll
RE: Weekly Report - Operation of MPT Plan
DATE: December 28, 2018

Traffic continues to flow well with no significant traffic delays on Rte 117 or on Roaring Brook Road. Eastbound and southbound vehicular traffic continues to clear through the Rte 117 intersection during almost all green light phases. There are still occasions when the northbound traffic on Rte 117 does not entirely clear during one cycle of the green light. The timing for the northbound left turn green arrow has not been lengthened yet.

Pedestrians continue to use the path created by the orange barriers and are crossing Rte 117 without incident. The "No Turn On Red" signs for the right turn from southbound Rte 117 onto Roaring Brook Road were removed on December 27, 2018. Chief Ferry and I did not feel the "No Turn On Red" restriction was necessary and the Town's traffic consultant supported our decision. The striping for the Rte 117 pedestrian crosswalk and Rte 117 "Do Not Block Intersection" designations have faded and are scheduled to be repainted.

School has not been in session this week and traffic has flowed well at the Roaring Brook Road and HGHS intersection. The timing of this light still needs to be adjusted. We are still waiting for the results of Lou's study of the intersection for this to be done. The incorrect lane markings leaving HGHS were scheduled to be repainted December 26, 2018, but due to a reported scheduling issue they are being done December 29, 2018. I have recommended the crosswalk on Roaring Brook Road from HGHS to Whole Foods also be repainted.

The western entrance to Whole Foods remains busy when employees are arriving and leaving work during peak commuting times. There continues to be no real safety concerns or traffic issues at this entrance.

There have been no accidents at any of the locations mentioned above.

The MPT plan continues to be safe and performing well.
